Property Watch™

Communitech's unique Property Watch™ system is designed for remote watching of your property/house/animals while you are away.

Combine your Broadband internet access with this unique system you can be anywhere ² and be able to access, and even look around your property.

Ideal for remote properties, and when you are away for extended times. You can look and see for yourself.

Features

- Property Watch is available with camera, housing and bracket, and modem router connected to your existing Broadband service *#
- Solar power available as optional extra
- Wireless configuration available (dependant on site survey)
- Camera has Pan Tilt Zoom (PTZ), so you can look around and see what is happening, even zoom in to something at a long distance.
- Quality of images is dependant on quality of service provide by Broadband provider and capacity of camera.

Shows installation of camera, with wireless and solar configuration on site.

² Anywhere a Broadband service is available.

* Broadband service provided and tested at your premises prior to site visit by our technicians. We will advise the Broadband settings required by our technicians.

Electrical services are not included.

Pole provided by third party or we can provide a pole suitable for your site.

For remote stand alone systems contact Communitech on 1300 550 932 for the complete Quick Deploy Range of Products
